

TECHNICOLOR COM1000 HD HEADEND SYSTEM

DIRECTV, in partnership with Technicolor, is proud to present the next generation HD content distribution system for the Hospitality Free-To-Guest market. The Pro:Idiom™ compliant COM1000 HD System with its compact modular design promises a cost reduction over existing technology while providing enhanced functionality and serviceability.

WHAT ARE THE KEY BENEFITS OF THE COM1000 SYSTEM?

- Remote monitoring
- Cost effective upgrade
- Smaller footprint
- Commercial Grade Equipment

FEATURES	BENEFITS
Cost effective solution to add incremental HD channels	Scalable and modular design reduces overall cost per channel as HD channels increase due to demand and availability
Plug & Play architecture	Reduces onsite time of installation and configuration as well as adding additional channels to existing system
Integrated Web Interface (Configuration Management and System Diagnostic Tools)	Simplifies configuration and support, while also allowing for system diagnostics and remote management, decreasing truck rolls and operational support costs
High Density Modular Design	Designed as a scalable blade/server architecture with the ability to support 2 to 24 SD or HD channels while only occupying 4RU of rack space
Environmental	FCC tested as Commercial Grade Equipment (designed for harsh environmental conditions) with low energy consumption, temperature awareness and self-cooling while providing the capacity for more channels in a smaller footprint
Scalability	Convenience of increasing channels as needed by adding 2-channel blades
Auto tracks satellite providers' programming changes	System intelligence allows for hands-off reconfiguration when satellite providers move or change their programming lineup
Redundancy of critical components	To maintain the highest level of system availability, critical components are redundant (e.g. power supplies and system cooling fans)
Multi-network compatible	Supports both RF and IP networks
Platform based core technology	The system has the ability to support any number of digital rights management and conditional access schemas
Electronic Program Guide	Customers can view available channels and programs currently playing with the touch of a button, and the property's logo can be included on the guide for continued brand exposure
